

Societies X

I will never be part of your society

The one you love

That you think of before you sleep

I will never be more than incomplete

I will never be anything more than me

I will be

Societies X

Broken, beaten we battle on

Fighting a fight that's been fought

For so long

Locked out the lives of the chosen

Living our lives in the mess

We'll never rest

We are

Societies X

I will never be part of your society

The one you love

That you think of before you sleep

I will never be more than incomplete

I will never be anything more than me

I will be

Societies X

They listen to all your lies

Despite our pleas and cries

Thrown out we were abandoned

Never did you care for our lives

Now we rise

The broken we form

The discarded we form

The excluded we form

Your leftovers

The ones who'll never be good enough

We are

Societies X
